PROFILE

AWS Solutions Architect Certified Software Developer with 1+ year of experience designing and deploying scalable, secure cloud-native applications. Skilled in DevOps practices, infrastructure as code, and CI/CD pipelines. Adept at working in agile teams and leveraging services like AWS Lambda, DynamoDB, and EC2 to build efficient, production-ready solutions. Committed to continuous learning and driving innovation through modern cloud technologies.

Professional Skills

AWS Solution Architect certified

- Built servers using AWS, importing volumes, launching EC2, creating Security groups, Auto-scaling, Load balancers (ELBs) using Cloud formation templates & AMI's using Infrastructure as a Service (IaaS).
- Designed, built, and deployed a multitude application utilizing almost all the AWS stack (Including EC2, S3), focusing on high-availability, fault tolerance, and auto-scaling.
- Designing cloud security VPC, Network Security, VPC peering, VPN, MFA and private disk encryptions.

EXPERIENCE

Software Developer Internship (Remote)

Sky It Services – Alberta, Canada | March 2025 – Current

- Led the development and enhancement of features for an internal web application, improving functionality and user experience.
- Built and maintained in-house software solutions using **Next.js**, **React**, and **Prisma ORM**, backed by **PostgreSQL** and deployed on **Microsoft Azure**.
- Performed thorough code reviews to ensure quality, maintainability, and adherence to best practices.
- Collaborated with cross-functional teams in Agile sprints, participating in planning and daily stand-ups via Google Meet.
- Translated complex requirements into robust, production-ready features aligned with detailed design specifications.

Software Developer (Internship)

DPIT Solutions – Pretoria, South Africa | June 2024 – Present

- Assisted the design and development of scalable web applications, resulting in a 5% increase in sales during initial market entry leveraging **Node.js**, **MongoDB**, **React.js**, and **Tailwind CSS**.
- Increased platform scalability and reliability by refactoring maintaining code, reducing technical debt by 10%.
- Enhanced team efficiency by 5% through active participation in agile sprint planning and iterative development, while implementing a robust CI/CD pipeline featuring pull requests, code reviews, load/stress testing, and comprehensive unit/integration/e2e testing.

EDUCATION

Bachelor's Degree in Software Development

Brigham Young University-Idaho (Rexburg, Idaho, USA)

January 2021 – December 2024 | **GPA: 3.7**

- **Object-Oriented Design:** Proficient in programming with C# and Java, emphasizing robust, scalable solutions.
- **Algorithm Development:** Strong understanding of data structures, algorithms, and computational complexity.
- **Team Collaboration:** Experienced in contributing to multidisciplinary projects, enhancing both technical outcomes and interpersonal communication skills.

TECHNICAL SKILLS

Languages: JavaScript | Python | SQL | HTML | CSS

Frameworks & Libraries: React | Node.js | Next JS | Express.js | Jest

Tools & Technologies: MySQL | Postgres | MongoDB | Git | Tailwind CSS | Vs Code | Intel

Development Practices: Agile methodologies, RESTful API design, and Continuous Integration/Deployment (CI/CD)
